PROFESSIONAL SUMMARY

I am a 2023 Statistics Science graduate with **2 years' work and hands-on experience** in full-stack development using **Angular, Python, Django**. In addition, I have a solid **Back-end** expertise in **Core Java, Advanced Java** and **SQL**. Adept at Statistical analysis and automation to optimize workflows and enhance decision making. I am eager to contribute to innovative projects and further develop my capabilities in the field.

KEY SKILLS

Front-End Technologies: Angular | HTML | CSS | DOM

Back-End Technologies: Django | REST APIs

Programming: Python | SQL | Core Java | Advanced Java

Database Systems: MySQL, Snowflake

Statistical Skills: Statistical Analysis and Data Interpretation

Tools: Visual Studio Code | Git | MS Excel

Soft Skills: Troubleshooting | Problem Solving | Team Coordination | Agile | SDLC | Communication Skills

EDUCATION

BSc (Stat) | G. VENKATASWAMY NAIDU COLLEGE | Jun'20 - May'23
Percentage - 87%

WORK EXPERIENCE

SDE - 1	AMAZON	Aug'25 - Present
- Designed and launched processing fee functionality for partners (Tabby Tamara) across payment selection and checkout pages, ensuring accurate fee visibility and enhancing checkout transparency —resulting in a 10% increase in checkout conversion rate. - Led the launch of a Comparison Table on the detail page to differentiate partner installment offers, displaying total amounts, processing fees, and other key fields across UAE, Egypt, Turkey, and KSA —driving a 12% improvement in feature adoption and customer satisfaction. - Onboarded more than 20+ new financing plans for multiple partners, expanding payment flexibility and financing options across the MENAT (Middle East, North Africa, and Turkey) regions. - Introduced a vendor-funded string component on the detail page to dynamically display seller names —improving offer clarity and boosting engagement metrics by 15%. - Optimized mobile offer selection flows by fixing inconsistencies in view modes, processing fees, and notifications, reducing checkout errors by 10%. - Contributed to international product launches in UAE, KSA, and Egypt, ensuring compliance with local payment systems and scaling platforms to support millions of transactions. - Diagnosed and resolved high-impact Customer production issues in Amazon's payment systems, enhancing cross-platform reliability, reducing downtime by 20%, and ensuring timely, high-quality releases through cross-functional collaboration. - Resolving pipeline challenges to achieve end-to-end continuous delivery (CD) automation		

SWE – 1 | **FIDELITY INVESTMENTS** | **Mar’24 – Mar’25**

- Streamlined data reconciliation processes, reducing manual efforts through intelligent automation.
- Developed dynamic user interfaces using Angular, ensuring seamless user experiences.
- Designed and implemented backend systems with Django for robust data handling and API integrations.
- Integrated custom SQL query execution to support complex operations and improve system flexibility.
- Built intelligent search and filtering functionalities, enhancing data retrieval efficiency.

TRAINEE | **UNIQ TECHNOLOGIES** | **Jan’22 – Dec’22**

- Developed a smart railway reservation system that predicts ticket availability and optimizes pricing models.
- Integrated real-time updates and personalized recommendations, enhancing the passenger experience.
- Designed an intuitive user-friendly interface for seamless booking and seat allocation.
- Applied machine learning algorithms to improve the efficiency of railway ticket management.

PROJECTS

1. Data Recon Engine
2. Railway Reservation System -Machine Learning Based
3. Portfolio Web Application

CERTIFICATIONS & ACHIEVEMENTS

- Web designing & Web application Development in Java Technology: **Accord Info Matrix**
- Certification in Python: **Uniq Technologies**
- Java Programming, Hypothesis Testing, Descriptive Statistics: **Great Learning**
- Online Certification in Udemy: **Python, Angular**
