

HARINI R
SOFTWARE ENGINEER
[LinkedIn](#) | [Email](#) | [Contact](#)

Professional Summary

- Initiative-taking and detail-oriented Software Engineer with **2 years** of experience in full-stack development using Angular, Python, and Django.
- Demonstrated expertise in building scalable backend systems with Core Java, Advanced Java, SQL.
- Adept at statistical analysis and automation to optimize workflows and enhance decision-making.
- Proven ability to deliver user-friendly, high-impact solutions by collaborating with cross-functional teams.
- Strong problem-solving skills and a commitment to continuous learning and professional development.

Skills

- Front-End Technologies: Angular, HTML, CSS, DOM
- Back-End Technologies: Django, REST APIs
- Programming Languages: Python, SQL, Core Java, Advanced Java
- Database Systems: MySQL
- Statistical Skills: Statistical Analysis and Data Interpretation
- Other Tools: Visual Studio Code, Git, Excel

Experience

Fidelity Investments | Analysis Research & Data | Data Recon Engine- Web Application

- Streamlined data reconciliation processes, reducing manual efforts through intelligent automation.
- Developed dynamic user interfaces using Angular, ensuring seamless user experiences.
- Designed and implemented backend systems with Django for robust data handling and API integrations.
- Integrated custom SQL query execution to support complex operations and improve system flexibility.
- Built intelligent search and filtering functionalities, enhancing data retrieval efficiency.

Uniq Technologies | Railway Reservation Ticket Booking using Machine Learning in Python

- Successfully completed a 1-year internship, gaining hands-on experience in machine learning and Python development.
- Developed a smart railway reservation system that predicts ticket availability and optimizes pricing models.
- Integrated real-time updates and personalized recommendations, enhancing the passenger experience.
- Designed an intuitive user-friendly interface for seamless booking and seat allocation.
- Applied machine learning algorithms to improve the efficiency of railway ticket management.

Certifications

- Accord Info MATRIX: Web designing & Web application Development, Java Technology
- Udemy: Master in Angular, Python Programming Master Class
- Great Learning: Java Programming, Hypothesis Testing, Descriptive Statistics
- Uniq Technologies: Introduction to programming using Python
- Uniq Technologies: Certificate of Excellence
- NexGen Cad: Introduction to programming using Java

Education

Bachelor of Science in Statistics
G.Venkataswamy Naidu College

- Gained Strong foundation in Data analytics, Statistics Modeling and Hypothesis testing (CGPA-8.00)

Projects

- Railway Reservation Ticket booking using Machine Learning In Python
- A study based on exploring the phenomenon of graduates working in unrelated field (using Statistical Analysis)
- Student Portal Database Management System – Java CRUD Operations
- Website Creation Using HTML, CSS and JS.
- Data Recon Engine-Web Application (Using Angular & Django)
